

PREPARED EXCLUSIVELY FOR

Gregory Geodjenian

EVP Growth, TM Forum

A short brief on why an Engagement Intelligence platform belongs at the centre of how TM Forum protects and grows its membership.

"You spent years making sure members joined TM Forum for the right reasons. This is the system that makes sure they never have a reason to leave."

CLAIRE WATSON · ENGAGEMENT MANAGER · TM FORUM

PREPARED FOR		ROLE

SUBJECT		PREPARED BY	
Engagement Intelligence Platform		Claire Watson, Engagement Manager	
2 min	0	24/7	I
TO SEE PORTFOLIO-WIDE RENEWAL RISK	SPREADSHEETS REQUIRED	AI-POWERED MEMBER ENGAGEMENT	SINGLE SOURCE OF TRUTH

Four Problems, Solved in One Platform

Built and battle-tested on Claire's own portfolio — every feature below is live today, not a roadmap slide.

THE PAIN · MEMBERSHIP CHURN

See renewal risk before it becomes a lost member

- Live Low / Medium / High churn-risk scoring per account — built from real engagement signals, not guesswork
- Renewal countdown alerts fire automatically inside a 90-day window, before it's a crisis
- Auto-generated, specific next actions for every at-risk account — never a mystery what to do next

THE PAIN · TEAM OVERSIGHT

Know what every Engagement Manager is doing — without asking

- Portfolio rolled up by Engagement Manager, Team and Region — filter to any slice in seconds
- Real activity data — sessions, catalysts, pipeline, events — not self-reported status updates
- Built to scale from one Engagement Manager today to a full team tomorrow, with zero re-architecture

THE PAIN · EXECUTIVE VISIBILITY

Give your Leadership Team confidence at a glance

- One screen answers the four questions leadership always asks: accounts, at-risk count, renewals due, engagement level
- Same live data your Engagement Managers use daily — nothing stale, nothing manually compiled for a meeting
- A documented, consistent methodology behind every risk flag — a real answer when leadership asks "why is this account red?"

THE PAIN · TIME

Give your team back the hours lost to status-chasing

- Risk scores and next actions generate themselves from real activity — no more compiling weekly updates by hand
- One login replaces a patchwork of spreadsheets, inboxes and calendars
- An AI ODA Expert chatbot and gamified ODA Game handle first-line member engagement 24/7 — freeing your team for conversations that need a human

A Few More Reasons This Matters

- 01 **Single source of truth.** Every workflow across the platform writes to one Google Sheet. No fragmented spreadsheets, no shadow trackers, no "which version is current."
- 02 **Built to scale, today.** The architecture already supports many Engagement Managers, many members, multiple Teams and Regions. This isn't a pilot that needs rebuilding to grow with TM Forum.
- 03 **TM Forum, practicing what it teaches.** An ODA-minded, API-driven, AI-native internal tool is itself proof of the transformation story TM Forum tells its members every day.
- 04 **Faster ramp for every new Engagement Manager.** Full account context — sessions, decision-making unit, catalysts, pipeline, maturity — is there from day one. No tribal knowledge required.

*Membership growth isn't only about the members you win — it's about never quietly losing the ones you already have. This platform turns renewal risk from a **year-end surprise** into a **week-one forecast**, gives your Engagement Managers the intelligence to act before it's too late, and gives your Leadership Team the confidence that comes from seeing everything, in real time, in one place.*
